

HYDRANT FLUSHING OCTOBER 17, 2017

Fall flushing of fire hydrants will be conducted on Tuesday, October 17th, starting at 8:00 a.m. and continuing until all flushing has been completed. Residents may notice lower water pressure and a slight discoloration of water as the flushing is performed in your area. The discoloration is not harmful and will clear up if you allow the water to run for a few extra minutes.

Flushing is done twice a year in order to remove any sediment that may accumulate in low flow areas of the water distribution system. The operation maintains the overall excellent water quality in our distribution system and ensures that each fire hydrant operates properly.

Mayor J. Nolan Higgins
