

Tree Care Information for

Prepared for you by the Trained Volunteers serving on the Shade Tree Commission

<https://www.arborday.org/trees/tips/mulching.cfm>

Dear Neighbor,

A young tree was recently planted in front of your home through a grant (from the State's Community Forestry Program) to restore our community's environment after several natural losses. Please don't allow this huge investment of time, materials and effort to go to waste. This flyer explains best tree care practices, so we can work together to help Freehold Borough flourish!

Mulch

See diagram above for the best mulch applications.

Trunk Health

You can reduce lawn mower damage and weed wacker injuries with mulch.

Tree Vigor/ Soil Moisture

You can use natural mulch to keep the roots moist & prevent soil compaction.
